HD over IP™ Benefits

- Scalability** - it is simple to right-size the HD over IP Matrix for your immediate needs, and when you are ready to add another TV or HD source to the mix, all you need to purchase is another Transmitter or Receiver.
- Flexibility** - you can put all of your sources in one closet, or you can distribute them throughout the home. It is truly an anything anywhere to anything anywhere else solution.
- More Flexibility** - the 1G integrated scaler allows you to mix or match different resolution HDTV monitors without having to lower the quality of your HDMI® sources. The 2G video pass-thru solution provides lossless video quality broadcasting with no scaler function.
- Even More Flexibility** - if you have legacy VGA, Component, or Composite sources it is simply a matter of using an HDMI converter to connect the legacy device to the HD over IP Matrix solution.
- Affordability** - when you compare a legacy HDMI Matrix switch with all of the devices needed to distribute the signal throughout the home, the Just Add Power solution comes out as a better bargain.
- Compatibility** - Just Add Power has worked with authorized dealers and industry leading manufacturers to develop automation drivers for a wide range of platforms including AMX, Control4, Crestron, M-Control, Pronto, RTI, Savant, Vantage, and URC. For digital signage users we offer the feature rich standalone **HD over IP Media Switcher™** licensed software for use with Windows, Mac, and Linux computers.
