

Remote Installation Training

Just Add
Power

The Just Add Power Remote Installation Training Program is designed to instruct you on the planning, setup, configuration, control, and troubleshooting of common parts of a Just Add Power system.

Training Program Includes:

- Project Planning
- System Configuration
- Control System Integration
- Integrated Endpoint Control

- Mosaic Video Wall
- Standard Video Wall
- Tiling Transmitter
- Warp Transmitter

Installers located within the US

- Be provided a series of training video
- Receive a Remote Training Kit for 60 days
- Follow along with the training videos to build the kit into a functional system
- Communicate one-on-one with a support technician about the training videos and any questions relating to the kit setup

Installers located outside the US

- Be provided a series of training videos
- Be provided a list of equipment needed for a more hands on experience (page 2)
- Follow along with the training videos to build a functional system
- Communicate one-on-one with a support technician and discuss any questions or complications about the training videos
