

# MaxColor™ 4K60

The Just Add Power MaxColor system is a 4K60, 36-bit color, 4:4:4 color format HDMI over IP distribution matrix.

## System Wide Features

### Transmitters

- Encodes computer and video resolution up to and including 4K60 @ 4:4:4
- Supports all lossless audio formats
- Supports deep color up to 36-bit
- HDR Support: HDR10, HDR10+, HLG, Dolby Vision, and SDR
- Endpoint Control: CEC and RS232
- Image Pull
- Zero detectable latency
- POE Powered
- Seamless Switching

### Receivers

- Encodes computer and video resolution up to and including 4K60 @ 4:4:4
- Supports all lossless audio formats
- Supports deep color up to 36-bit
- HDR Support: HDR10, HDR10+, HLG, Dolby Vision, and SDR
- Endpoint Control: CEC and RS232
- Image Pull
- Image Push
- Zero detectable latency
- POE Powered
- Seamless Switching
- Supports Standard Video Wall

## Just Add Power AV over IP

Just Add Power introduced HDMI/AV over IP to the professional AV industry in 2008. Since being the first to bring this protocol to market, the company has expanded and improved its products, focusing solely on developing the most outstanding AV over IP solutions imaginable.

There are several benefits to choosing Just Add Power for your AV over IP system.

**Continuous advances** - Just Add Power employs a proprietary chipset and codec developed by the company. This combination has been specifically designed to provide the highest quality performance and work reliably for years. It is designed to encode and decode AV signals flawlessly, with ultra-low latency that is not visible to the human eye.

Because it is designed by the company, the codec can be re-engineered as advances in technology are made. Devices are designed to accept firmware updates for these advances, increasing their performance and feature set - even for existing systems.

**Seamless Integrations and Support** – Just Add Power works with its design team, technical development staff, and integration partners to ensure that all elements of an AV system are working together seamlessly. Drivers are provided for most major control systems and an open API is offered for those who would like to develop their own. Switches that meet system capability are tested and certified to work with Just Add Power devices. The company's installation software makes it a simple step by step process to configure the devices in a system.

Because all of this work is done in-house, the company's technical support staff is able to assist integrators with installation and maintenance of a system with the knowledge base necessary to troubleshoot most issues, even if they aren't caused by Just Add Power devices.

# 3G ULTRA 4K30

The Just Add Power 3G Ultra system is a 4K30 HDMI over IP distribution matrix. It can accept 4K60 video input, but will output video at a maximum of 4K30.

3G Ultra devices are compatible with 2G Omega devices.

**MaxColor and 3G Ultra are not compatible. They are independent systems that can run on the same switch and be integrated with additional hardware.**

## System Wide Features

### Transmitters

- Encodes 4K30 or lower resolutions
- Supports HDCP 2.2
- 4K60 compatible at 4K30
- HDR: HDR10, HLG, SDR
- Seamless switching
- Integrated endpoint control
- Zero detectable latency
- EDID management
- POE powered (unless otherwise noted)
- Plug-Play-Present
- Image pull
- All 3D formats supported

### Receivers

- 4K30 & lower resolution support
- Resolution output scaling
- HDR: HDR10, HLG, SDR
- HDCP 2.2
- All lossless audio supported
- Integrated video scaler
- Seamless switching
- Integrated endpoint control
- Video wall with rotation
- EDID management
- POE powered (unless otherwise noted)
- Plug-Play-Present built-in
- DHCP Integration
- Image push, pull & pop
- On screen display
- All 3D formats supported

Because all of this work is done in-house, the company's technical support staff is able to assist integrators with installation and maintenance of a system with the knowledge base necessary to troubleshoot most issues, even if they aren't caused by Just Add Power devices.

# 2G OMEGA 1080p

The Just Add Power 2G Omega system is a 1080p HDMI over IP distribution matrix.

3G Ultra devices are compatible with 2G Omega devices in case you need a mixture of 1080p and 4K30 in the same installation.

## System Wide Features

### Transmitters

- Encodes 1080p or lower resolutions
- Supports HDCP 2.2
- HDR support
- Seamless switching
- Zero detectable latency
- EDID management
- POE powered (unless otherwise noted)
- Plug-Play-Present

## Commercial - Boardroom & Outdoor Amphitheater

Calile Hotel

Location: Brisbane, Australia

Integrator: Soho Sound Design

J+P's 2GΩ/3G PoE transmitters and receivers combine the enhanced audio and feature-set of the company's 3G Ultra HD Over IP system with the maximum 1080p resolution of 2G HD Over IP devices. The Calile's system supports 1080p video with HDCP 1.4, all lossless audio formats including Dolby Atmos, control endpoints with RS-232 and IR, and image push, pull, and pop features.

The Calile's J+P system is engineered to provide complete scalability, so expansion with an additional screen or source is as simple as adding another receiver or transmitter. Furthermore, the solutions provide the hotel with infrastructure to meet future 4K requirements by mixing and matching devices, with 2GΩ devices on 1080p sources and 3G on 4K sources.
