

Remote Installation Training

Just Add **Power**

The Just Add Power Remote Installation Training Program is designed to instruct you on the planning, setup, configuration, control, and troubleshooting of common parts of a Just Add Power system.

Training Program Includes:

- Project Planning
- System Configuration
- Control System Integration
- Integrated Endpoint Control

- Mosaic Video Wall
- Standard Video Wall
- Tiling Transmitter
- Warp Transmitter

Installers located within the US

- Be provided a series of training video
- Receive a Remote Training Kit for 6 weeks
- Follow the training videos to build the kit into a functional system
- Communicate one-on-one with a support technician on any questions relating to the kit setup. RIT support available 9am-5pm Eastern US, Monday through Thursday.

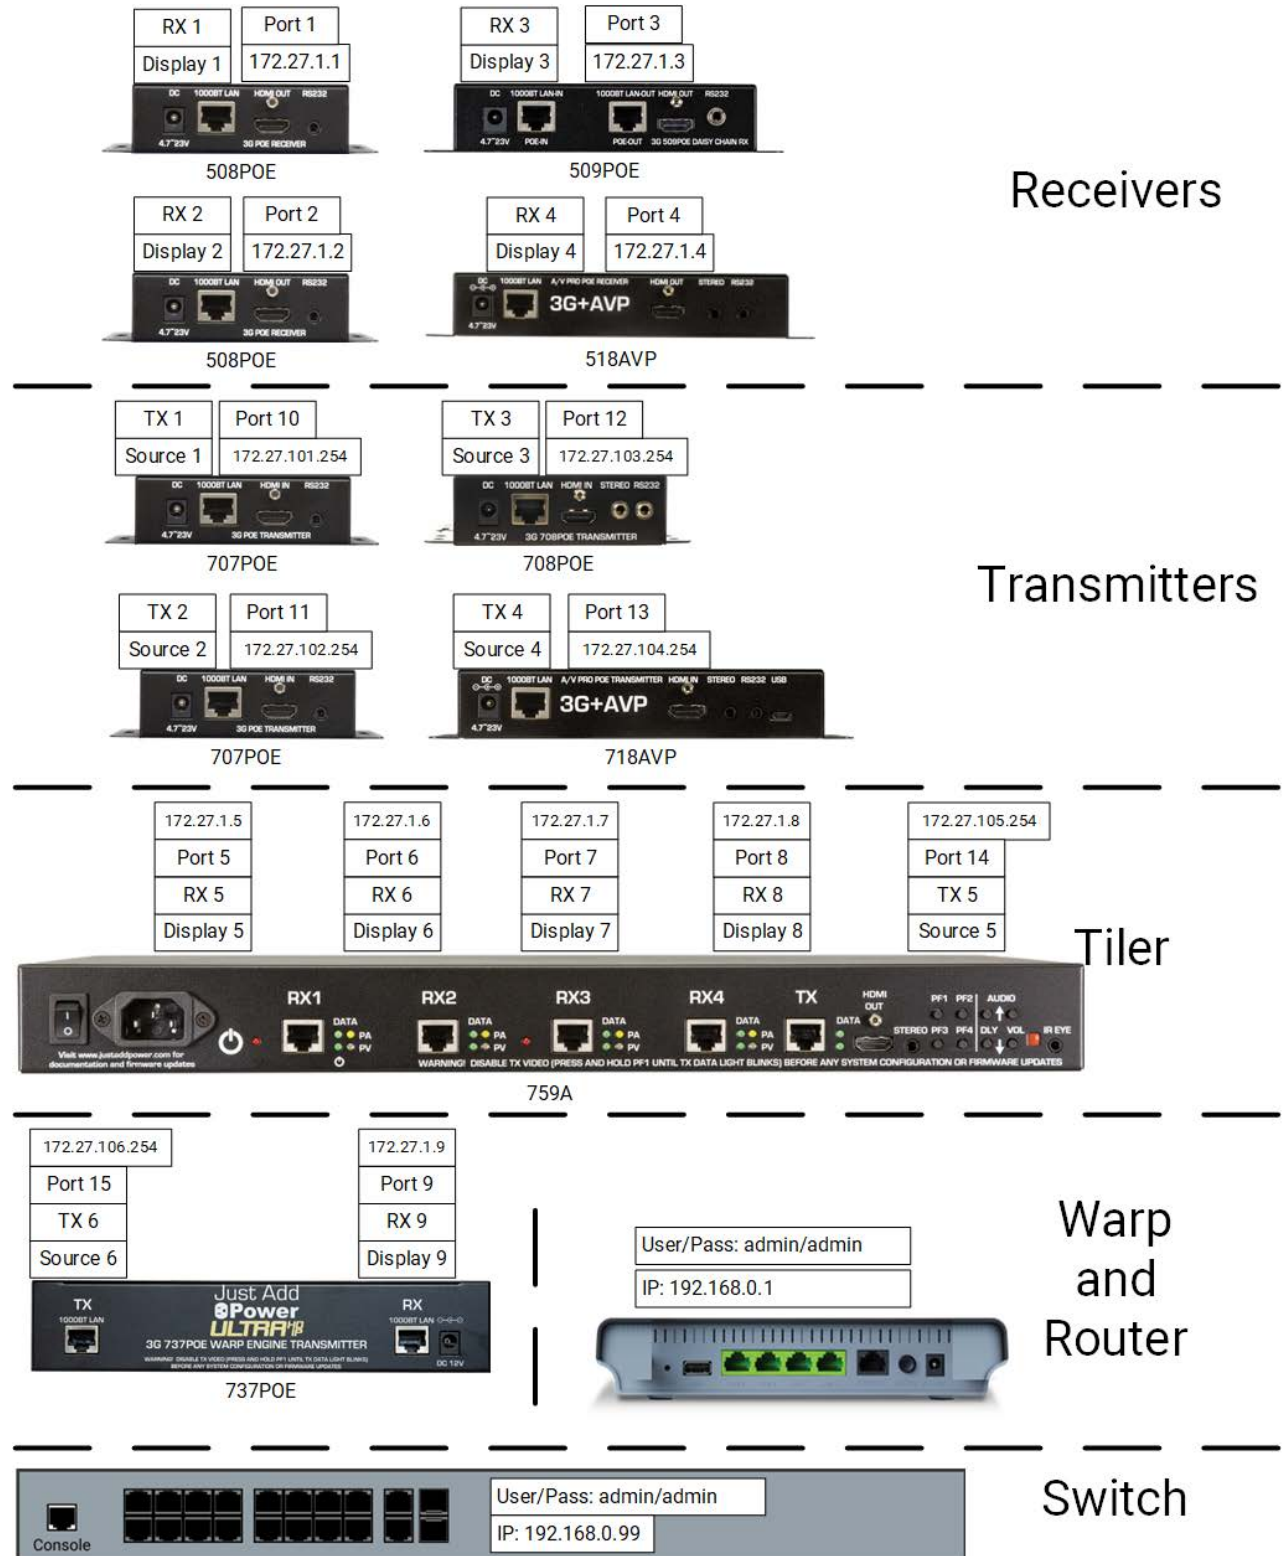

Installers located outside the US

- Be provided a series of training videos
- Be provided a list of equipment needed for a more hands on experience (page 2)
- Follow the training videos to build a functional system
- Communicate one-on-one with a support technician on any questions about the training videos. RIT support available 9am-5pm Eastern US, Monday through Thursday.
