

Warp Engine Transmitter with 360° Video Rotation

The 3G Ultra Warp Engine Transmitter rotates any video signal in 0.1° degree increments.

A single Warp Engine Transmitter can build a full Artistic Video Wall with displays rotated at any angle and the ability to show any source in the system!

The Warp Engine Transmitter is fully compatible with all 3G Ultra installations. Add a single Warp Engine to provide rotation to all displays. Multiple Warp Engines can be combined to produce more complex Artistic Video Walls.

Features

Artistic Video Wall

Create, build and watch your new video wall come to life with the ability to rotate your displays up to 360 degrees.

Scalability

Fully compatible with all 3G Ultra products

Video Rotation

Rotate any HDMI source in a Just Add Power matrix in 0.1 degree increments

Rotate your video up to 360° degrees

Any video input from 3G system

New, rotated video output
